

ABSTRACT OF THE DISCLOSURE

0052718-032000

5 Buccal aerosol sprays or capsule using polar and non-polar solvent have now been developed which provide biologically active compounds for rapid absorption through the oral mucosa, resulting in fast onset of effect. The buccal polar compositions of the invention comprises formulation I: aqueous polar solvent 30-99.89%, active compound 0.001-60%, optionally containing flavoring agent 0.1-10%. Propellant 2-10% .The non polar composition of the invention

10 comprises formulation II: non-polar solvent 20-85%, active compound 0.005-50%, and optionally flavoring agent 0.1-10% and propellant 50-80%.
